---

Seraiki web publishing script,

The discussion on script is need of the time. Nastaaleeq is not supportive on web. Nassakh which is originally an Arabic script is in vogue in more than thirty Muslim countries, and even the Govt. of Iran has discarded Nastaaleeq and opted Nassakh. Why we are so regressive, not to part with Nastaaleeq. Sounds of B, D, G, nG, J, nJ and, rNoon and Noon Ghunah are available on Unicode.

No Govt. or any conference of linguists will ever be able to solve this problem. Our younger generation is hardly working on it and fast reaching the solution. All of us agree on above sounds and symbols. The only issue is that we have no courage to part with our beloved "Nastaaleeq".

The Seraiki composing software will be very soon be available on wasaib.com for public use.

Please click the following link to view a sample of Seraiki Nassakh. You can view it properly by downloading Seraiki font given on the link
